

# CONCRETE SHEDS & SAFE ROOMS

**A system that is a durable, storm resistant, quick to construct, and slow to degrade; resulting in the creation of a structure that retains value and longevity.**

- Studs and track are attached to the concrete face by tabs that are punched out of the side flange.
- Exterior concrete face (3000psi) is 2" thick (min.). Reinforced with micro rebar.
- The resulting product is a structurally sound building panel that contains a finished outside surface with an exposed stud interior.
